THE PROACTIVE COMPANY

Water is Precious - Keep it Hygienically

The supply of clean, fresh water is rapidly becoming more and more constrained as populations rise and demand for high quality water grows around the world.

The challenge is multifaceted. Increasing regulatory pressures require tighter and tighter limits on various contaminants in drinking water supplies and wastewater discharges. Increasing standards of living dictate consumer demand for better tasting water that is free of off-colours and odours. Increasing industrial processes also require cleaner feed water quality. As these various demands for improved water quality continue to grow, pro-active solutions are needed.

TECHNICAL - INNOVATIVE COMPANY

(Enhance the Quality of Life)

RHINOX work primarily focuses on product systems, which involves bringing components, technologies and service together. Bringing these elements together is a highly creative process – a composing of forward-looking solutions. The wealth of expertise and different backgrounds of the RHINOX companies and its employees are a kit with many treasures.

Fire Sprinklers

Your Partner for Plumbing & Heating Systems

The right solution for all applications. Certified Products. A complete range able to meet all demands and needs. Application areas with special requirements call for specific products. Our solutions suit the individual needs of the users – Economical, Elegant, Robust & Hygienic.

THE COMPLETE SOLUTION COMPANY

Everything under one-roof

Our qualified project management supervises every development step effectively and efficiently. We assist you in finding the best material for your field of application. You profit from our expertise in metal and production concepts. We guarantee high-quality products by cooperating only with certified suppliers.

- Planning (Product and Project Consultation)
- Designing (Design Services)
- BIM Library
- Operation (A thinking brain to improve the installer work and safety / Product Logistic Management)
- Installation (On-site Support / Continuous Training)

THE HYGIENE SOLUTION COMPANY

Highest levels of water comfort

Pure and fresh water is indispensable for every household. Whether for showering, bathing, brushing, cooking or hand washing. Having clean water available in the desired volume and at the desired temperature is a significant constituent of our modern life. The fact that this water is also hygienic is, of course, a prerequisite.

A hand holding a globe with a city skyline, surrounded by hot air balloons, a rocket, and celestial bodies.

THE CONCERNED COMPANY

- **Health Solution Product**

Stainless steel is the material of choice for handling food, pharmaceuticals and other materials when absolute hygiene must be maintained. It is essentially inert, posing no risk of cross contamination, tainting, chemical reaction, toxicity or corrosion.

Water is a basic requirement for health, well-being, and all growth. The Rhinox stainless steel pipe system was developed specifically for this essential element, so as to deliver spring-clear water to you at home, at work, everywhere!

- **Environment-oriented – 100% Recycling :**

Rhinox stainless steel pipe uses less raw material than other Stainless Steel Pipes. Stainless steel pipe limits environmental impact as compared to alternative pipe materials. Its corrosion resistance minimizes the potential for product loss. Stainless steel is not a petroleum product. There is also less energy loss within stainless steel pipe due to its smooth, low friction interior, and stainless steel pipe is 100% recoverable either through recycling or reuse.

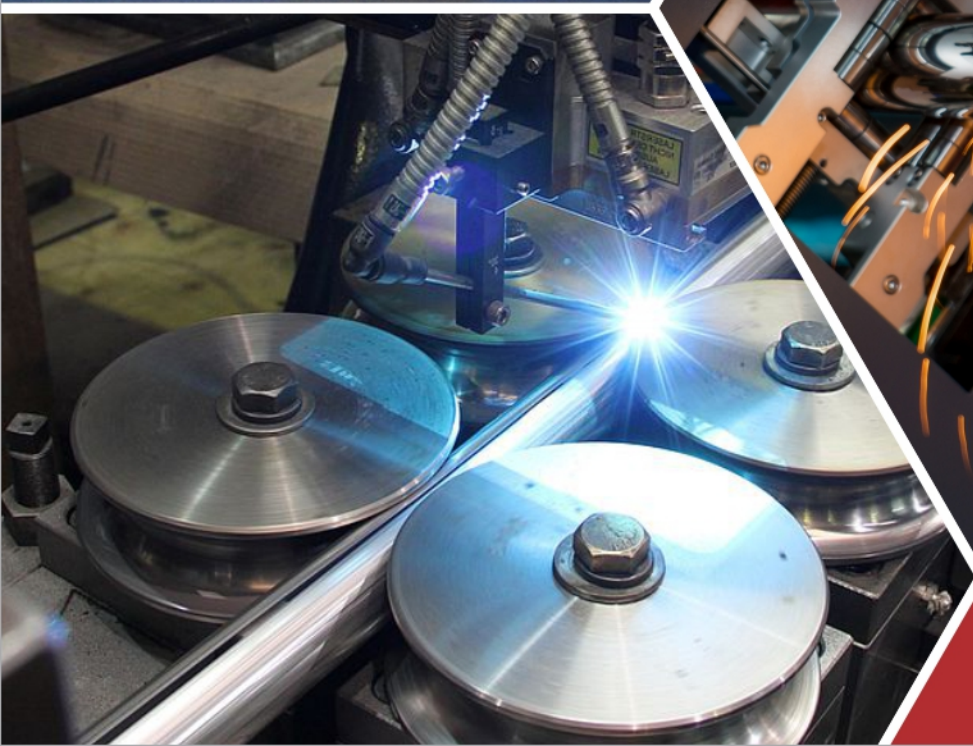

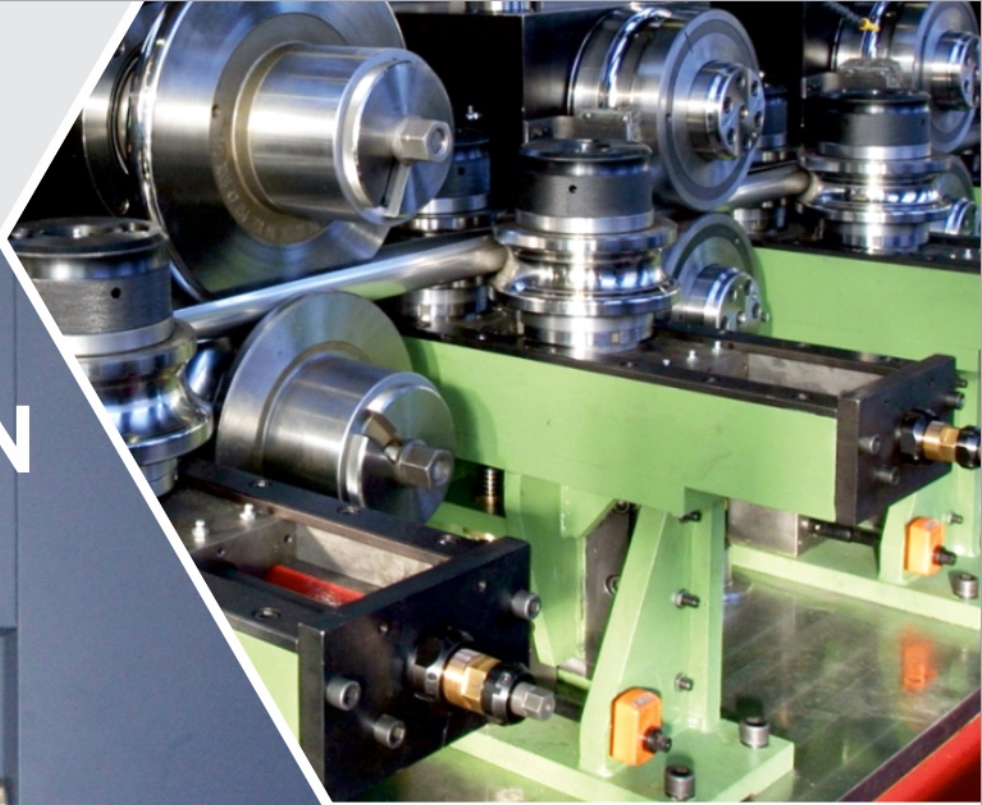

THE SUSTAINABLE PRODUCT COMPANY

Rhinox has set the standard for piping efficiencies, engineering expertise and performance reliability, creating a sustainable piping system that lasts the life of the buildings where they are installed. The innovative products designed and manufactured by Rhinox are inherently sustainable and offer design solutions that reduce the impact on our environment:

- Seismic capabilities to maintain piping system integrity during seismic events
- Adaptable products that can be easily retrofitted on any building
- No flame required therefore reducing waste and toxic fumes
- More efficient water flow and higher values to increase operating efficiencies

THE PRODUCTION COMPANY

THE RESEARCH & DEVELOPMENT COMPANY

Since its establishment, it has performed The Task of Research & Development Of New Products, performance improvement and product manufacturing technique which are suitable for green technology.

It will do the best to lead a role in green growth, in pursuit of growing into a leading edge technology research institute on the 21st century, hinging on the active research and development.

THE EMPLOYEE FOCUSED COMPANY

- What we really care about is “Our Employees”
- Your Passionate involvement in the workplace.
- Dedicated to bettering your life.
- FOCUSED ON YOU & WE WILL ALWAYS BE .

Every employee is made to feel a part of the extended RHINOX family. They think and act respectively cross-linked.

The shared values and close ties between the RHINOX family and its employees lay the foundations for our relationships with business partners, customers, users and other representatives from business, science, politics and society.

100% SATISFACTORY COMPANY

Marketing Activities & Distribution System :
Closely Connected to Local Customers

In order to meet the expectations of customers who use our products, we engage in activities that accurately capture the customer needs and work with distributors and dealers who are familiar with local customers. We will continue to promote our optimal distribution system and marketing activities going forward.

Our products can be purchased & used world wide, as we regional headquarters, branches and offices in selective areas around the world with complete chain of distributors who are familiar with the region and can therefore support customers.

Dynamic

Our focus on customer requirements, our innovative expertise and balanced diversification make us a dynamic company. We quickly adapt to changing conditions, exploit the opportunities that come our way and make efficient use of our internal and external resources.

Responsible

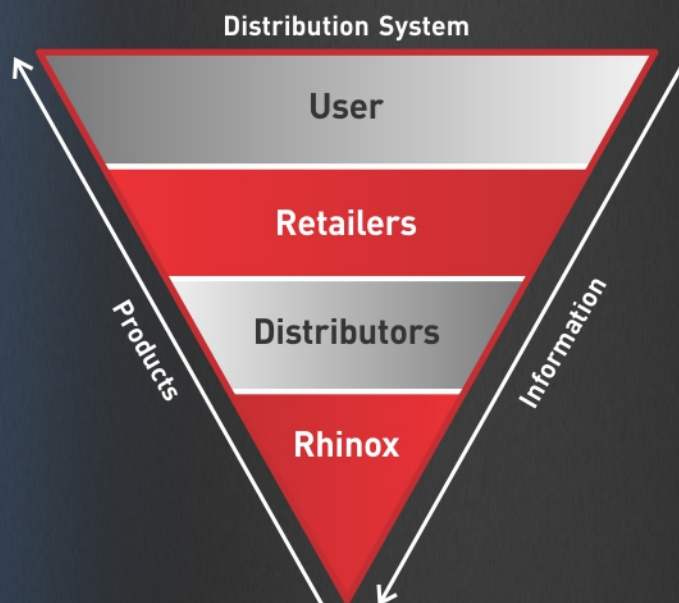

We place great value on sustainable and responsible business activities. We take responsibility for the processes in our companies, for our products, our employees, our

business partners, the environment and society.

Passion

Our enthusiasm and motivation give rise to solutions that extend beyond the product itself to include comprehensive services. The joint efforts of our employees and involvement of externals in the solution-finding process, in particular the customers themselves, lead to ingenious results.
